Work Experience:

Jio Financial Services (Payroll – Rbhu ETG Pvt Ltd) **(Nov 2025 – Present)**

- Currently working with **Jio Insurance Broking Limited** as an **AI Engineer**
- Built AI Agents and RAG-based chatbots using LangChain with memory, leveraging Microsoft Foundry, AWS Bedrock, and Google Vertex AI for scalable, context-aware solutions with memory write feature.
- Developed AI voice bots integrated with inbound/outbound calling, WhatsApp, and email automation using SMTP

Data Scientist Intern, PassionBytes Pvt Ltd **(August 2025 – Nov 2025)**

- Implemented data deduplication and entity resolution using Splink and analytics techniques, enhancing data quality and accuracy across large datasets.

Machine Learning Intern, RDC Concrete Pvt. Ltd. **(April 2025 – July 2025)**

- Designed and deployed a high-accuracy computer vision pipeline and API to detect construction material quality in real time, integrated with the company's Data Management System and validated using Postman and Apache.

Skills:

Programming Languages: Python, C, C++, Kotlin, JavaScript, SQL

Frameworks & Libraries: Flask, Django, Node.js, TensorFlow, PyTorch, OpenCV, Scikit-learn, Pandas, NumPy

AI Architecture & Agent Frameworks: Advanced AI System Architecture, Agentic AI, LangChain, LangGraph, MCP (Model Context Protocol), RAG Pipelines, Tools and Actions Integration, Vector Search.

Data & Analytics: Pyspark,Hadoop, Power BI, Microsoft Fabric, Trino, Athena,Semantic Models, Data Lake

Web & Tools: Html,CSS,Gradio, Streamlit, Postman, Apache JMeter, Git, Google Apps Script,AWS App Runner

Cloud & AI Platforms:AWS Bedrock, Microsoft Foundry, Google Vertex AI, MinIO,AWS

Databases: MySQL, MongoDB, PostgreSQL,Qdrant,Opensearch,S3 Vector Storage.

Other Skills: Generative AI**,** AI Agents, Postman,API Integration, Problem Solving, Algorithm Design, Software Development, Data Structures

Projects:

Anne – AI Voice Bot for Automotive CRM

- Developed Anne, a real-time AI voice bot using LiveKit, serving as a core conversational layer within a car dealership's CRM for inbound and outbound customer interactions.
- Enabled low-latency voice conversations with speech-to-text, text-to-speech, and LLM-driven dialogue orchestration, supporting use cases such as lead qualification, service reminders, test-drive scheduling, and follow-ups. Integrated conversational memory and backend APIs to maintain customer context across calls, ensuring personalized interactions and seamless CRM data synchronization.

Smriti – RAG-Based Conversational AI System

- Built a Retrieval-Augmented Generation (RAG) chatbot using LangChain with persistent memory to deliver accurate, context-aware answers over structured and unstructured legal documents.Integrated Microsoft Foundry with AWS Bedrock and vector search to enable scalable document ingestion, semantic retrieval, and grounded LLM responses for legal workflows
- .Deployed the system via secure web interfaces and APIs to assist the legal team by answering day-to-day legal queries for 85 employees, improving knowledge accessibility and response efficiency

Education:

University of Mumbai **(June 2021 – May 2025)**
Bachelor of Engineering (Information Technology) **CGPA – 8.28**
Relevant Coursework: Cloud Computing, Computer Networks, Databases, Operating System, Machine Learning, Neural Networks, Object Oriented Programming, Data Structure and Algorithm

Achievements:

- Qualified GATE 2024 and GATE 2025
- Published a research paper (Paper ID 142) at ICTEAH 2025, developing a deep learning system for automated tree enumeration and species classification using satellite and drone imagery to scale forest biodiversity analysis.
